## Wire-Line Deployed Spearhead Acid

### Enviro-Syn<sup>®</sup> HCR-7000-WL<sup>™</sup> Modified Acid<sup>™</sup> Systems (Patents Pending)

Enviro-Syn<sup>®</sup> HCR-7000-WL<sup>™</sup> is part of the “Environmentally Responsible” Modified Acid<sup>™</sup> product line that minimizes the hazardous exposure levels, corrosion rates and negative HS&E properties of HCl while maintaining the positive aspects of solubilizing ability and reactivity rates.

**Wireline samples after 96 hours exposure at 90 °C (194 °F) at 600 psi**

33% HCR-7000-WL

Premium 7.5% HCl acid blend

Competitor Product

### BENEFITS

- Ultra-long term wire-line and BHA corrosion protection
- Save up to 20 minutes equipment time per stage
- Save up to one hole volume of water per stage
- Increase acid placement efficiency across perforation clusters
- Non-regulated for transport and storage in the USA (by ground)
- Multiple North American manufacturing / stock points
- Low-fuming and non-corrosive to human tissue
- Proven across North America with major operators
- Approved by most major wire-line operators and service companies
